

IN THE SPECIFICATION:

Please amend paragraph [031] as shown below, in which deleted terms are shown with strikethrough and added terms are shown with underscoring.

Paragraph [031]

In the following description, the first end is the rear of the vehicle and the second end is the front of the vehicle. The fuel reservoir or tank is arranged under the rear seat. The exhaust pipe constitutes an expansion chamber. It should further be noted that, although the following description discusses an arrangement where the driver's seat is located on the right side of the vehicle, a mirror image construction could be made for a situation in which the driver's seat is disposed on the left side of the vehicle, for use in countries where vehicles drive on the right-hand side of the road.
